

Technical Bulletin

Bulletin No.: PRO-08-25 Effective Date: 11/1/94 Page: 1 of 1

Subject: **Competitive Desiccant Cartridges in AlliedSignal TBS Air Dryers**

This bulletin is to clarify AlliedSignal's position on the use of competitive desiccant cartridges in Bendix air dryers.

Because of the unknown quality and reliability of the materials and workmanship employed by competitive companies, AlliedSignal Truck Brake Systems will not honor warranty claims against its published standard or extended (TAG) warranties when a competitive desiccant cartridge is used in any Bendix air dryer. A competitive desiccant cartridge is a desiccant cartridge manufactured or rebuilt by a competitive firm and includes a Bendix cartridge rebuilt by anyone other than AlliedSignal.
